

EPIC WILD HOG SCRAM PROFESSIONAL

Wild Hog Scram Professional was specially formulated for residential areas that have wild hog activity. Feral hogs feed primarily at night but will feed during daylight in cold weather or wet weather. Rooting is easily recognized because it looks as if the soil has been plowed. **Wild Hog Scram's** ingredients disrupt their digestive system and deters them from returning.

● **General Application Instructions:**

- Apply using a rotary spreader. Apply at a rate of one pound per 600 square feet. Cover the area where wild hog damage has been observed and/or is occurring. Extend the coverage to about thirty (30) feet around and beyond the damaged area.

For lawn & garden areas of 5,000 or less square feet: we recommend covering the entire area.

For gardens & beds: Hand sprinkle, using the scoop provided, within damaged garden plots & beds. **Locate entry trails if possible.** Apply in a band across the trail where it enters an area to be protected. Also, apply on the trail for 30 feet back from the entrance using a 4-foot wide band.

Reapply Wild Hog Scram Pro in 14 days after the initial application and then every 30 days or as needed.

- **All Season Use:** Each application of Wild Hog Scram Professional should last 30 days including normal rainfall or irrigation. Extremely heavy rain may require re-application.

**Do not contaminate water, food or feed by storage or disposal.
Do not apply directly to water.**
