

# IGUANA SCRAM<sup>™</sup> PROFESSIONAL

## APPLICATION INSTRUCTIONS

**IGUANA SCRAM PROFESSIONAL<sup>™</sup>** provides strong repelling power without harming pets, people or the environment.\* This new product was specially formulated **and tested** to naturally train Iguanas to avoid treated areas and is both easily applied and long lasting.

**FLOWER BEDS, SHRUBS, GARDEN:** Sprinkle to form a border approximately 15 to 18 inches out from the edge of the bed with a 20-24 inch band of Iguana Scram.

Apply so it is visibly heavy enough to see. Sprinkle around tree bases to keep iguana's from climbing tree to get to any vegetation.

**FOR EXCESSIVE PROBLEMS IN  
HIGH IGUANA DENSITY AREA:**

Apply as above and Add a second band 15 inches out from the first strip around the bed and broadcast Iguana Scram lightly throughout the inside of the bed. This will stop the problem and only a single band nearest the bed will be needed thereafter for maintenance applications going forward.

**Do not contaminate water, food or feed by storage or disposal. Do not apply directly to water.**

*\*When used as directed.*
